Summary

UX Engineer with 3+ years of experience bridging design and engineering to ship B2B and B2C products across automotive, healthcare, and e-commerce. Expert in taking products from user research and interaction design to production code in Kotlin, backed by scalable design systems and WCAG-accessible UI. Proficient in AI-powered design and coding workflows (Claude, Cursor, LLMs) that accelerate prototyping and design-to-code handoff. Proven impact includes a 35% lift in feature adoption and an 84% rise in user retention. Committed to aligning product, engineering, and business stakeholders around data-driven decisions that deliver measurable outcomes.

Work Experience

UX Engineer, In-Vehicle HMI | *Traxen Inc, Automotive*

Plymouth, MI | Sep 2024 – Present

- Leading UX and product direction for the iQCruise tablet interface, a production Android in-vehicle infotainment (IVI) app for commercial trucks, owning the full lifecycle from discovery and user research through development, validation, and release.
- Driving UX and product strategy that delivered a 35% increase in feature adoption, synthesizing user research, stakeholder input, and usage analytics into interaction models, information architecture, and success metrics while reducing error rates in safety-critical driving.
- Leading stakeholder management across product, engineering, and business teams in Agile sprints tracked in Jira, aligning on feature priorities and design decisions to ship a WCAG-accessible, high-fidelity experience.
- Accelerating iteration and design-to-code handoff by integrating AI-assisted design and coding workflows (Claude, Cursor, LLMs, CLI automation), prototyping in Figma and Android Studio with high design fidelity.
- Defined event logging and analytics instrumentation for funnel tracking and post-launch usage analysis, and authored installation and onboarding documentation that improved installation success rates.

UX Engineer Intern | *Traxen Inc, Automotive*

Plymouth, MI | Jun 2024 – Sep 2024

- Redesigned the iQCruise tablet UI using Material Design 3 and Android Auto guidelines, delivering a consistent, accessible experience for drivers navigating multiple in-vehicle screens.
- Built end-to-end features from mid- and high-fidelity Penpot mockups to implementation in Kotlin and Android Studio, iterating on driver interview feedback to improve usability and performance.

Product Designer | *General Motors, Automotive*

Ann Arbor, MI | Jan 2024 – Apr 2024

- Designed an end-to-end in-vehicle HMI for GM's luxury customer segment across 4 connected surfaces (central console, driver display, front console, and companion mobile app), balancing comfort, convenience, and personalization.
- Reduced driver cognitive load by restructuring the driver-display information hierarchy around steering-wheel sightlines and enabling multi-modal input across steering-wheel controls, voice, and touch.

AR/VR Design Instructor | *University of Michigan*

Ann Arbor, MI | Jan 2024 – Apr 2024

- Taught immersive UX principles, spatial interaction design, and VR prototyping (Bezi, Unity) in SI 559 Introduction to AR/VR, partnering with the course instructor on curriculum delivery for graduate students.
- Mentored student teams through end-to-end AR/VR projects, delivering design critiques and technical guidance that took concepts from ideation to working VR prototypes.

Product Design Intern | *Desai Accelerator, Startups*

Ann Arbor, MI | May 2023 – Aug 2023

- Accelerated market entry for 5 startups by spearheading simultaneous MVP launches across healthcare, fitness, and e-commerce, managing cross-functional priorities to deliver launch-ready, high-fidelity designs.
- Drove a 60% increase in unique app opens and an 84% rise in user retention for BuyMySpot by leading end-to-end UX research (customer interviews, surveys, card sorting) and redesigning its search and filtering experience.
- Designed and prototyped responsive mobile and web interfaces for multiple clients, establishing style guides and branding frameworks that ensured consistent cross-platform experiences.
- Developed UX flows, wireframes, and prototypes for Bastion and OrbAid that improved onboarding and engagement, collaborating closely with founders and developers under tight deadlines.

UX Researcher | *The Orbit Lab, University of Michigan*

Ann Arbor, MI | Jan 2023 – Dec 2023

- Led a 5-person multidisciplinary team to revamp Beta, a research-partner matching platform, using contextual interviews and competitive analysis to redesign profiles and communication features.
- Revitalized the ORBIT project's website and social media presence in Adobe Illustrator and Photoshop, creating a brand design guide that ensured consistency and expanded audience reach.

Education

M.S. in Information (Human-Computer Interaction) University of Michigan GPA 3.97/4.0	Ann Arbor, MI 2024
<i>Design & Social Media Officer, Student Organization for Human-Computer Interaction (SOCHI)</i>	
B.Tech in Computer Science and Engineering SRM Institute of Science and Technology	Chennai, India 2021
<i>Creative Team Member, Google Developer Student Clubs (GDSC)</i>	

Certifications

- Visual Elements of User Interface Design** | Coursera (CalArts)
- Human-Centered Design: An Introduction** | Coursera (UC San Diego)
- Data Science for Engineers** | NPTEL (IIT Madras)

Skills

Design: Interaction Design, Visual Design, Information Architecture, Design Systems, Wireframing, Prototyping, High-Fidelity UI, Material Design 3, Accessibility (WCAG 2.1), Automotive HMI, AR/VR

Research: User Interviews, Contextual Inquiry, Usability Testing, A/B Testing, Surveys, Card Sorting, Diary Studies, Focus Groups, Heuristic Evaluation, Competitive Analysis, Affinity Mapping, Thematic Analysis, Personas, Journey Mapping

AI: AI-Assisted Prototyping, AI-Assisted Coding, LLM Workflows, Prompt Engineering, Claude, Cursor, ChatGPT, CLI Automation

Product: Product Strategy, Feature Prioritization, MVP Scoping, Success Metrics & KPIs, Data-Driven Decision-Making, Stakeholder Management, Cross-Functional Collaboration, Agile / Scrum, Jira

Technical: Figma, Framer, Penpot, Kotlin, Android Studio, HTML/CSS, JavaScript, Python, SQL, GitHub, Adobe CC, Miro, Unity

Awards

- \$7,000 Winner, Optimize Social Innovation Challenge, University of Michigan (CommunityConnect EdTech platform, 2023)
- \$4,000 Winner, Learning Levers Competition, School of Education, University of Michigan (2023)
- Irma M. Wyman Scholar, Center for the Education of Women+, University of Michigan (2023–2024)
